

Steps for Installing Saketa Apps

Pre-requisites

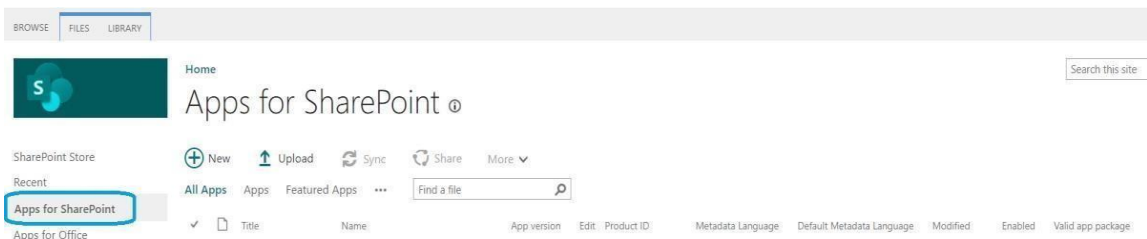

- User Account with Full control or with Administration permissions
- App catalog site exists in SharePoint Tenant.
- SharePoint site i.e., Teams site template.

Steps for installing Saketa app.

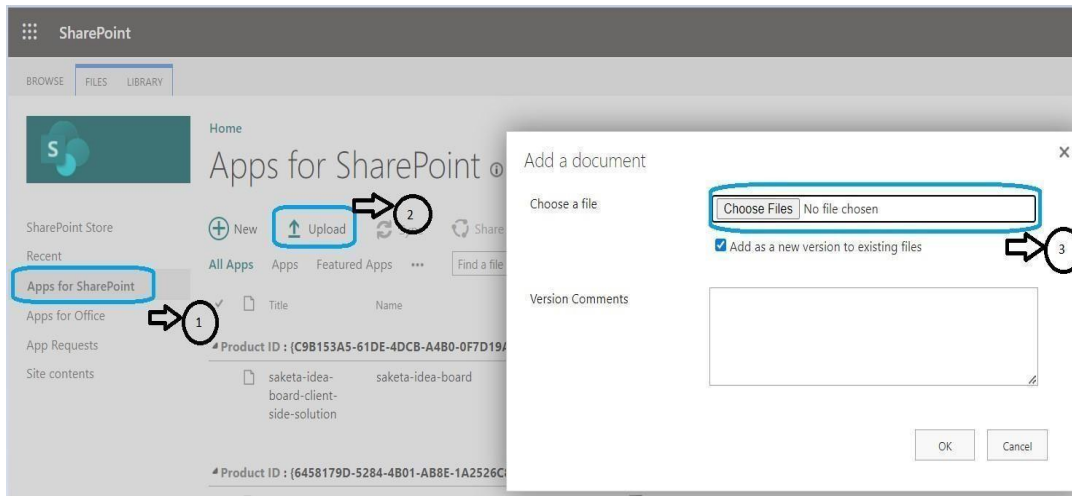

Login to SharePoint App catalog site with admin account.

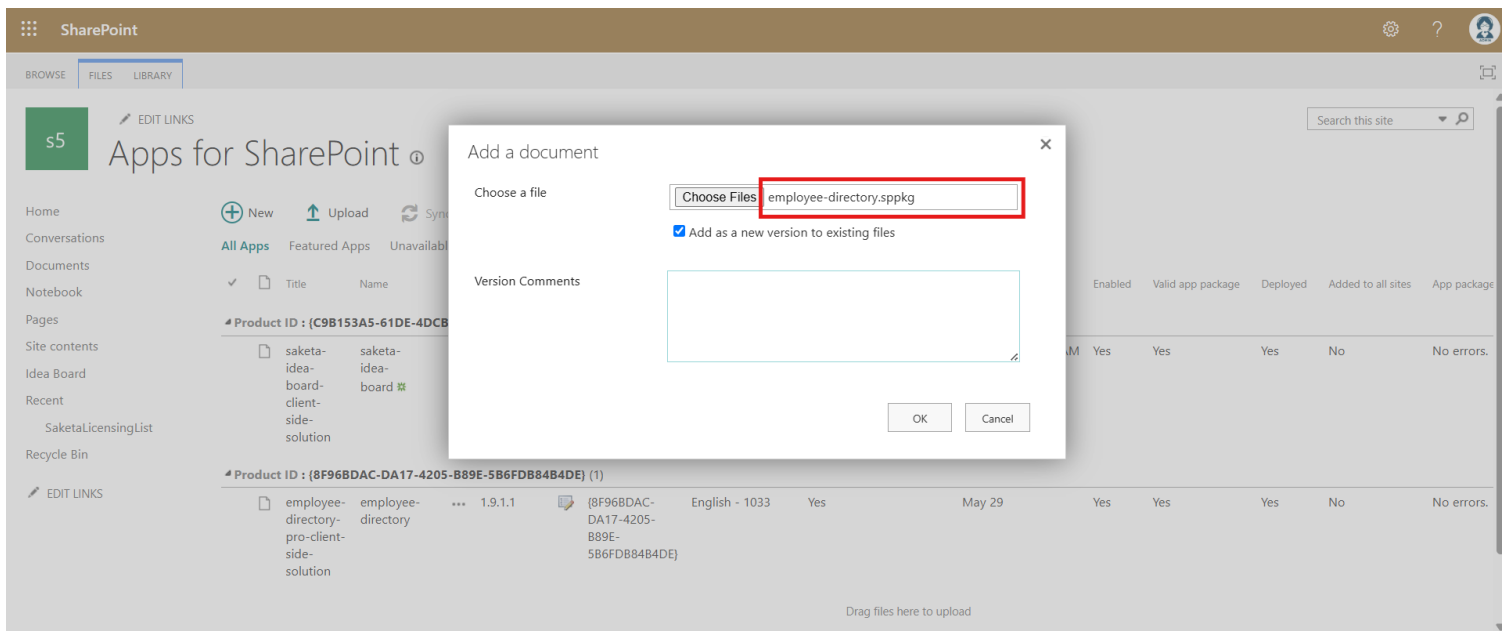

Click on App catalog site and navigate to “Apps for SharePoint”.

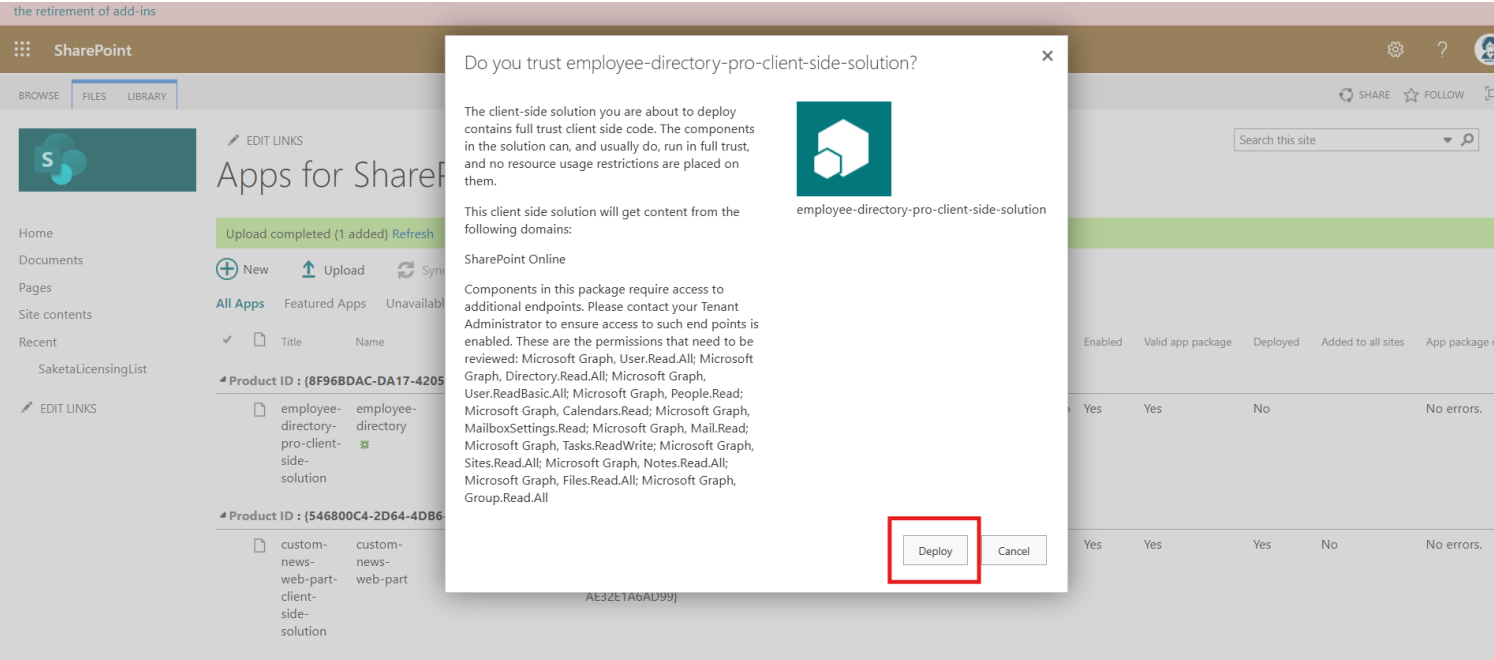

Click on “Upload” option and pop-up screen opens to choose the file.

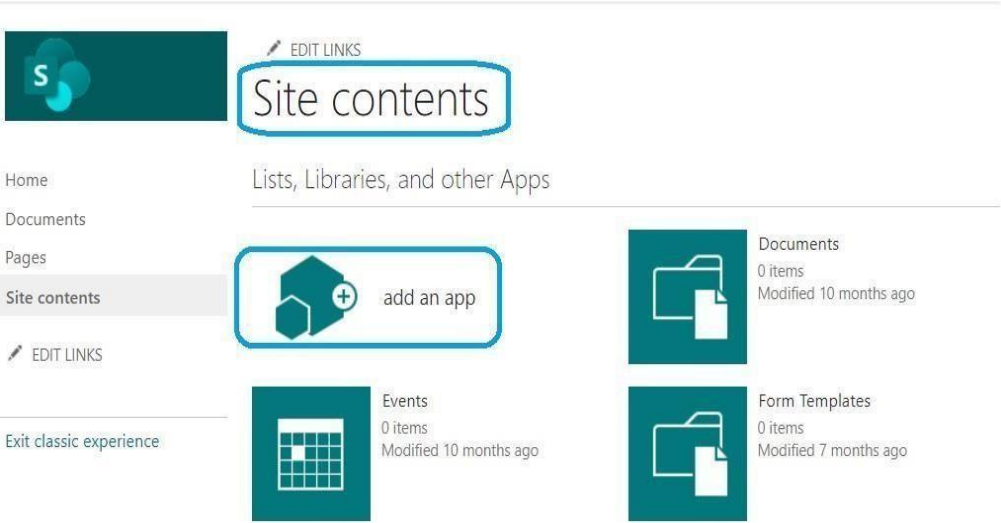

Choose the .sppkg file that was downloaded and click on “Ok” button.

Click on Deploy Button to add SPFx File to the tenant.

Now navigate to SharePoint site where this application needs to be installed.

Click on “From Your Organization” and search for app name as shown below

My apps
